PROFILE

Backend-focused Computer Science engineer (KIIT, 2027) with production experience building **REST APIs, real-time systems, and AI-integrated applications** using **Node.js, Python, and cloud infrastructure (AWS)**. Co-founded NextInCampus (1st Place — Startup Grind; IIT Bhubaneswar Innovation Showcase 2024). Strong grounding in **API design, database architecture (MongoDB, PostgreSQL, Redis)**, and automated validation pipelines. Solved 100+ LeetCode problems (medium/hard). Currently targeting **Backend / SDET internship roles**.

EXPERIENCE

Part-Time Backend Developer · HighRadius Project · 5th Sem

4 Months

- Worked on a production-level fintech codebase using **Node.js and Express**; built **REST APIs** and designed **PostgreSQL** schemas with **JWT-based authentication**
- Developed **MongoDB** aggregation pipelines for reporting and analytics dashboards
- Delivered sprint-based production-ready code in a cross-functional team environment

STARTUP

Co-Founder & Full-Stack Developer · NextInCampus

2024 – Present

1st Place — Startup Grind · Selected for IIT Bhubaneswar Innovation Showcase 2024

- Built a student referral platform end-to-end: user profiles, company-tagged alumni listings, referral workflows, and **real-time status tracking via WebSockets**
- Implemented **role-based access control (RBAC)** (student / senior / admin), secure **JWT auth**, and smart alumni matching by company, role, and domain
- Designed and maintained **REST APIs** and **PostgreSQL / MongoDB** schemas supporting thousands of referral transactions

PROJECTS

AI-Powered Real-Time Interview & Coding Battle Platform – prepnerve.vercel.app

Tech: Node.js, React, TypeScript, WebSockets, Socket.IO, MongoDB, PostgreSQL, Supabase, Gemini API, Groq SDK, React Three Fiber, Monaco Editor, AWS (S3, EC2)

- Built a **real-time multiplayer coding arena (1v1/1v1v1)** using **WebSockets and event-driven architecture** on Node.js (Socket.IO)
- Designed an **AI semantic code evaluator** using **Gemini API and Groq SDK** — scoring correctness, time complexity, and code quality (automated validation pipeline)
- Built a **PDF resume parsing pipeline** powering an ATS alignment scoring module — automated **data extraction, validation, and structured reporting**
- Integrated **Supabase** for auth and real-time DB; deployed assets on **AWS S3** and hosted backend on **AWS EC2** (CI/CD-ready deployment)
- Structured a categorised question bank of 1000+ problems spanning DSA, system design, and core CS — with automated tagging and retrieval via **REST API endpoints**

Voice-Based AI Appointment Assistant – github.com/mdsaif36/Ai-Backend

Tech: Node.js, Python, Groq SDK, Whisper STT, Twilio, Google Calendar API, WebSockets, FastAPI-style REST endpoints

- Built an end-to-end **voice AI pipeline in Python & Node.js**: speech → Whisper STT transcription → GPT reasoning → TTS output with <2s round-trip latency
- Implemented **function calling with structured JSON extraction** achieving **95%+ scheduling accuracy** — automated intent validation and error handling
- Integrated **RESTful API endpoints** with Twilio (phone) and Google Calendar API for fully automated appointment scheduling and **microservice communication**
- Reduced simulated manual booking time by ~80% through automated **intent recognition, input validation, and calendar writes**

EDUCATION

B.Tech in Computer Science & Engineering · KIIT University, Bhubaneswar

2023 – 2027

SKILLS

Languages: Python, JavaScript / Node.js, TypeScript, Java

Backend & APIs: REST APIs, FastAPI (Python), Express.js, WebSockets / Socket.IO, JWT Auth, Microservices

Databases: MongoDB, PostgreSQL, MySQL, Redis, Supabase

Cloud / DevOps: AWS (S3, EC2), Docker, CI/CD (GitHub Actions), Git, Postman

Testing & Automation: API Testing (RESTful validation), Automated pipelines, Playwright / Selenium (learning), Jest, Postman

AI / ML & Data: Gemini API, Groq SDK, OpenAI API, Whisper STT, LLM Integration, Pandas, NumPy, ETL pipeline design

CS Fundamentals: DSA (100+ LeetCode, medium/hard), OOP, System Design, SDLC, DBMS

ACHIEVEMENTS

- 1st Prize — Startup Grind Competition; selected to present at IIT Bhubaneswar Innovation Showcase 2024
- Built and deployed 2 production-grade AI applications serving real users on AWS infrastructure
